WORK EXPERIENCE

Accenture - Application Development Analyst | Mumbai, India | March 2024 - August 2024

- Engineered 5+ Spring Boot microservices for core banking transactions including recurring deposits, mandates, and remittance processing.
- Integrated Kafka for real-time processing and attained throughput of 100,000+ transactions daily.
- Designed Jenkins CI pipelines for Spring Boot services, reducing average build-to-deploy cycle time by 25%.
- Improved software quality with 90%+ code coverage using JUnit and Mockito.

Accenture - Application Development Associate | Mumbai, India | September 2022 - March 2024

- Led 8 developers building a scalable task-tracking system with Alpine.js, Tailwind CSS, Java, Spring Boot, AWS, and PostgreSQL.
- Implemented Kanban workflows, story creation, and estimation features for cross-functional sprint planning.
- Reduced bundle size by 20% and cut initial page load time by 1.8s through a custom Webpack setup.

ACADEMIC EXPERIENCE

NYU Langone Health - Research Assistant | New York City, NY | July 2025 - Present

- Fine-tuned 3+ vision-language models on a curated dataset of 50k+ clinical images.
- Built reproducible data preprocessing and benchmarking pipelines using AUROC, F1, and per-class accuracy.
- Benchmarked PEFT strategies across architectures and identified configurations improving AUROC by 3-5%.

New York University - Course Assistant | New York City, NY | September 2025 - Present

- Mentored 100+ graduate students across AI workflows, GPU profiling, and performance bottleneck analysis.
- Supported labs and assignments involving PyTorch profiling, CUDA concepts, vLLM, RAG, fine-tuning, quantization, and cloud deployment.

PROJECTS

Jitsi Topic Segmentation and Recap MLOps System | Python, PostgreSQL, Docker, MLflow, Grafana

- Built a data orchestration layer for a Jitsi meeting system by ingesting transcripts, storing workflow state, and transforming meeting data into model-ready inputs.
- Implemented human-in-the-loop feedback capture for user corrections and edited recaps, creating reusable retraining data.
- Integrated MLOps monitoring and data quality gates to detect model degradation with Grafana and Alertmanager.

Real-Time Data Visualization Dashboard | Java, Spring Boot

- Created a real-time analytics dashboard with Spring Boot, REST APIs, and WebSocket/STOMP streaming for live application metrics.

Optimizing Transformer-Based Time Series Forecasting | PyTorch

- Incorporated FlashAttention into Temporal Fusion Transformer training and achieved a 10.9% training time reduction.

EDUCATION

New York University - M.S. in Computer Engineering | GPA: 3.87/4.00 | September 2024 - May 2026

University of Mumbai - B.Tech. in Information Technology | GPA: 8.64/10.00 | August 2018 - July 2022

Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Generative AI / LLMs

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C++, SQL, HTML, CSS

Frameworks and Libraries: React, Node.js, Spring Boot, Angular, Django, PySpark, PyTorch

Databases: MySQL, PostgreSQL, MongoDB

Cloud Platforms and Tools: AWS, Docker, Git, Linux, Kafka, MLflow, Grafana
